New Delhi: Good news for flight passengers bad news for the husbands and lovers. TRAI has allowed in flight mobile phones and internet facility. Now the wife are going to keep an eye on husbands from 3000 metre above. A Report.

This practice is already allowed on the aircrafts flying international. Earlier the Civil aviation ministry put the matter o hold because of security concern. On Friday TRAI recommended the the on Board Mobile and Internet access shloud be permitted with minimum height restriction of 3,000 metres in Indian airspace. In its recommendation TRAI states, The authority recommends that both, Internet and mobile communication on aircraft service should be permitted as In-Flight Connectivity (IFC) in the Indian airspace.” Above 3000 metres Phone calls can be mad eor received. International aircrafts only allow internet access, as the mobile connectivity ma cause unwanted cause in the aircraft. Trai also mentioned, the electronic gadgets such as mobile phone, tab, laptop should be use only after the announcement .
